OBJECTIVE

To kickstart my career in the Tech Industry and contribute my skills in Software development and Programming. Seeking a position that allows me to apply my knowledge.

PROJECT EXPERIENCE

Interactive Sessions   ReactJs | NodeJs | ExpressJs | SQLite

Developed an Interactive Sessions Web Application with dummy data . User can be a student or a mentor. If the user is Mentor then his/her Scheduled sessions are shown . If the user is Student then his/her sessions are shown and he/she can book a new schedule. Here I have used ReactJs for Frontend and NodeJs and ExpressJs for Backend development. For API calls I have used RESTfull APIs and SQLIte Databases

Link : // Interactive Sessions

TODO Web Application   ReactJs | NodeJs | ExpressJs | SQLite

Developed a TODO Web Application where user can create an account and login into account. User can Create his Profile, create a new Todo, update and Delete a Todo. Here I have used ReactJs for Frontend and NodeJs and ExpressJs for Backend development. For API calls I have used RESTFULL APIs and SQLIte Databases

AI CHAT BOT   Google Colab | Open AI |Hugging Face

During workshop on AGI , built a chatbot .
I have used Google Colab , Open AI , Hugging Face in the building process.
We can chat with AI Bot . Due to it is a Free Version from Open AI It takes some extra time to give reply .
